

Saviynt L100 Interview Questions

Saviynt Basics

1. What is IGA?
2. What is IAM?
3. What is the difference between IAM and IGA?
4. What is an Identity?
5. What is an Account?
6. What is the difference between Identity and Account?
7. What is an Entitlement?
8. What is a Role?
9. What is the difference between Role and Entitlement?
10. What is Birthright Access?
11. What is Requestable Access?
12. What is an Application?
13. What is an Endpoint?
14. What is a Resource?
15. What is an Organization?
16. What is an Identity Repository?
17. What is an Identity Warehouse?
18. Explain Identity Lifecycle (Joiner-Mover-Leaver).
19. What is Governance?
20. What is Compliance?
21. What is Audit?
22. What is Risk?
23. What is SoD?
24. What is Access Certification?
25. What is Provisioning?
26. What is Deprovisioning?
27. What is Reconciliation?
28. Explain the complete Joiner process.

Architecture

29. Explain Saviynt Architecture.
30. What is ECM?
31. What is Database Schema?
32. What is REST API?
33. What are Connectors?

- 34. What is Identity Repository?
- 35. What are Microservices?
- 36. What is Job Scheduler?
- 37. What is Queue?
- 38. What is Vault?
- 39. What is Encryption?
- 40. Explain the complete Saviynt Architecture flow.

Authentication & SSO

- 41. What is Authentication?
- 42. What is Authorization?
- 43. Difference between Authentication and Authorization?
- 44. What is SSO?
- 45. Explain the SSO flow.
- 46. What is Okta?
- 47. What is SAML?
- 48. Explain the SAML Authentication Flow.
- 49. Difference between SAML and OAuth?
- 50. Difference between OAuth and OpenID Connect?
- 51. What is MFA?
- 52. What is Pass-through Authentication?
- 53. What is LDAP?
- 54. What is Active Directory?
- 55. Difference between Active Directory and Azure AD?
- 56. How does Saviynt integrate with Okta?

SAV Roles

- 57. What is a SAV Role?
- 58. What is a Custom SAV Role?
- 59. Difference between SAV Role and User Role?
- 60. Why do we create Custom SAV Roles?
- 61. How do you assign a SAV Role?
- 62. Can a user have multiple SAV Roles?
- 63. What is Role Hierarchy?
- 64. What is Role Delegation?
- 65. Difference between Admin Role and User Role?
- 66. Explain the principle of least privilege.

Certificates

- 67. What is a Certificate?
- 68. Why are Certificates required?
- 69. What is SSL/TLS?
- 70. Difference between Keystore and Truststore?
- 71. What is a Key Pair?
- 72. Difference between Public Key and Private Key?
- 73. What is Certificate Import?
- 74. Why do SSL handshake failures occur?
- 75. How do you troubleshoot certificate issues?

Identity Management

- 76. What is Identity Management?
- 77. Why is HRMS called the Source of Truth?
- 78. What is Workday?
- 79. What is HR Import?
- 80. What is User Import?
- 81. What is Account Import?
- 82. Difference between User Import and Account Import?
- 83. Difference between Full Import and Incremental Import?
- 84. What is Identity Update?
- 85. What is Identity Refresh?
- 86. What is Correlation?
- 87. Difference between Correlation and Account Linking?
- 88. What is Account Mapping?
- 89. What is Attribute Mapping?
- 90. What are Identity Attributes?
- 91. Explain the Joiner process.
- 92. Explain the Mover process.
- 93. Explain the Leaver process.

Applications

- 94. What is a Connected Application?
- 95. What is a Disconnected Application?
- 96. Difference between Connected and Disconnected Applications?
- 97. What is Application Discovery?
- 98. What is an Integration Agent?
- 99. What is JDBC?
- 100. What is an LDAP Connector?
- 101. What is a REST Connector?

- 102. What is SCIM?
- 103. Difference between REST and SCIM?
- 104. Explain how to onboard a Connected Application.
- 105. Explain how to onboard a Disconnected Application.

Access Requests

- 106. What is an Access Request?
- 107. What are the different types of Access Requests?
- 108. Difference between New Access, Modify Access, and Remove Access?
- 109. What is Self Request?
- 110. What is Manager Request?
- 111. What is Admin Request?
- 112. What is Bulk Request?
- 113. What is Emergency Access?
- 114. What is JITA?
- 115. Difference between Emergency Access and JITA?
- 116. What is Request Card?
- 117. What is Checkout?
- 118. Explain the complete Access Request lifecycle.

Approval Workflow

- 119. What is a Workflow?
- 120. What is an Approval Workflow?
- 121. What is an Approval Chain?
- 122. What is Multi-Level Approval?
- 123. Difference between Manager Approval and Owner Approval?
- 124. What is Auto Approval?
- 125. What happens if an approver rejects a request?
- 126. What is Escalation?
- 127. What is Delegation?
- 128. What is SLA?
- 129. Explain the Approval Workflow.

Provisioning

- 130. What is Provisioning?
- 131. What is a Provisioning Task?
- 132. What is Task Queue?
- 133. What is Retry?
- 134. What is Retry Count?

- 135. What are the Task Status values?
- 136. Difference between Pending, Success, and Failed?
- 137. What is Manual Fulfillment?
- 138. What is Connector Execution?
- 139. What happens after an Access Request is approved?
- 140. How do you troubleshoot failed provisioning?

Email

- 141. What is an Email Template?
- 142. What is an Email Notification?
- 143. What is SMTP?
- 144. What is a Trigger?
- 145. What is Reminder?
- 146. What is Escalation Mail?
- 147. What happens if SMTP is not configured?
- 148. How do you troubleshoot email failures?

AI & Recommendations

- 149. What are Recommendations?
- 150. What are Intelligent Recommendations?
- 151. What are Dynamic Peer Groups?
- 152. What is Peer Analysis?
- 153. What are Similar Users?
- 154. What is AI Engine?
- 155. What is Recommendation Score?
- 156. How does Intelligent Recommendation work?
- 157. How are Dynamic Peer Groups created?
- 158. Where are Recommendations used?

Access Governance

- 159. What is Certification?
- 160. What is a Campaign?
- 161. Who is a Reviewer?
- 162. What are Reviewer Decisions?
- 163. What is Revoke?
- 164. Difference between Reassign and Delegate?
- 165. What is Campaign Expiration?
- 166. What is Reminder?
- 167. What is Escalation?

- 168. What is Threshold?
- 169. Explain the Certification process.

Policy & Risk

- 170. What is a Policy?
- 171. What is Policy Engine?
- 172. What is a Rule?
- 173. What is a Ruleset?
- 174. Difference between Rule and Ruleset?
- 175. What is SoD?
- 176. What is Risk Score?
- 177. What is Mitigation?
- 178. What is Exception?
- 179. How does Policy Engine work?
- 180. What happens when an SoD violation occurs?

Jobs

- 181. What is Job Control?
- 182. What is Scheduler?
- 183. What is Import Job?
- 184. What is Provisioning Job?
- 185. What is Analytics Job?
- 186. What is Cleanup Job?
- 187. What is Task Engine?
- 188. Difference between Run Job and Retry Job?
- 189. What is Job History?
- 190. What are Job Logs?
- 191. How do you troubleshoot failed jobs?

Analytics

- 192. What is Analytics?
- 193. What are Reports?
- 194. What is Dashboard?
- 195. What is Saved Search?
- 196. What is Query?
- 197. What are Filters?
- 198. What are Metrics?
- 199. What are Audit Logs?
- 200. How do Analytics help in compliance?

Troubleshooting

- 201. How do you troubleshoot issues in Saviynt?
- 202. Where do you check Logs?
- 203. What are Connector Logs?
- 204. What are Job Logs?
- 205. What are Error Codes?
- 206. What causes Provisioning Failure?
- 207. What causes Import Failure?
- 208. What are Mapping Issues?
- 209. What causes Correlation Failure?
- 210. What causes Workflow Failure?
- 211. Why are email notifications not being sent?
- 212. How do you troubleshoot Certification Issues?
- 213. How do you troubleshoot Access Request Issues?
- 214. What is your troubleshooting approach?
- 215. Which logs do you check first during troubleshooting?
